COURSEWORK

UNDERGRADUATE

Data Structures & Algorithms

Design and Analysis of Algorithms

Object Oriented Programming

Operating System

Database Management System

Computer Networks

Software Engineering

SKILLS

PROGRAMMING

Experienced:

C++

Data Structures & Algorithms

HTML, CSS

React

Intermediate:

Nodejs • Expressjs • MongoDB •

Javascript • Redux • jQuery • MUI •

Bootstrap • Tailwind CSS • Redux • Redux

Familiar:

Java • Python • Typescript • Next.js •

Angular.js

SOFTWARE DEVELOPMENT KIT

Stripe • Razorpay • Google Calendar SDK

• GitHub SDK • AUTH0

TOOLS

Git/Github • Atlas • Postman • Visual

Studio Code • Adobe Photoshop

PROJECTS

SHOPIO- ECOMMERCE WEBSITE

May 2023 – June 2023

- Developed a personalized user account system, allowing customers to track their orders and manage their profiles.
- Implemented inventory management tools to facilitate stock tracking for seller.
- Integrated secure payment processing using Stripe for hassle-free transactions.
- Designed a comprehensive dashboard for sellers to access insights, sales data, and manage inventory efficiently.

CODLAX- CONTEST REMINDER

Jan 2023 – April 2023

- Developed an innovative online contest reminder web application with calendar integration and event creation functionality.
- Incorporated seamless Google account sign-in functionality to enhance user convenience and accessibility.

NOTIO- NOTES MANAGER

June 2023 – Jul 2023

- Implemented state management using ContextAPI for efficient data handling and seamless user experience.
- User authentication system to ensure secure access to individual notes.
- Enabled users to select and edit important notes with ease, improving note management and productivity.

EXPERIENCE

IIC - DCRUST | FRONTEND DEVELOPER

May 2022 – June 2022 | On Site

- Interned as a UX/UI Designer, responsible for creating simple and classic designs for the dashboard, navbar, and menus of the website.
- Successfully improved the website's responsiveness and introduced animations for a more engaging user experience.

GOOGLE CLOUD FACILITATOR PROGRAM

April 2021 - June 2021 | Qwiklabs

- Actively participated in the Google Cloud Facilitator Program, gaining expertise in cloud computing and Google Cloud Platform (GCP).
- Strengthened cloud skills and knowledge in the Google Cloud Platform through practical training and real-world problem-solving.

ACHIEVEMENTS AND HONORS

- Solved over 400+ problems, secured connoisseur batches on Leetcode continuously for five months.
- 4 stars on Codechef (highest: 1853), global rank 22 in April long challenge.
- Secured a global rank of 1203 in Google Kickstart 2023.
- Established and actively cultivated a thriving Discord community for university students with a shared passion for coding.
- Led open-source development efforts as the lead of DCRUSTODC society.
- Achieved success in SnackDown Round B and actively participated in 100+ contests, showcasing strong problem-solving and competitive programming skills.
