EDUCATION

- **Deenbandhu Chhotu Ram University of Science and Technology**   Sonipat, India
  Bachelor of Technology - Computer Science and Engineering; GPA: 8.2   *October 2020 - September 2024*
- **Rps Sr. Sec. School**   Rewari, India
  Senior Secondary; Percentage: 92   *April 2018 - March 2020*
  Main Course: *Non-Medical*

SKILLS SUMMARY

- **Languages**:   C++, JavaScript, Python, C, Java, TypeScript
- **Frameworks**:   ExpressJS, Redux, NodeJS, React Js, WordPress, jQuery, Next.js, MUI, Bootstrap, ChakraUI, Talwind CSS
- **SDK**:   Stripe, Razorpay, Google calendar SDK, GitHub SDK, AUTH0
- **Tools**:   Git/Github, MongoDB, Atlas, Compass, Postman, Visual Studio Code, Adobe Photoshop, premiere pro
- **Platforms**:   Web, Windows, MacOS, Renderforest, Canva
- **Soft Skills**:   Leadership, Project Management, Public Speaking, Time Management

EXPERIENCE

- **Full Stack Developer - IIC - DCRUST**   On Site
  Frontend Engineer   *May 2022 - June 2022*
  - **Simple and classic designs**: Created design of the dashboard, navbar and menus of the website. .
  - **Other changes**: Made website more responsive and animated.

- **Group Project- Developer UI**   On Site
  Full-Stack Developer   *May 2023 - Ongoing*
  - **Responsive Design**: It is built with a mobile-first approach, ensuring that websites and web applications look and function well on different devices and screen sizes. It provides a responsive grid system that automatically adjusts the layout based on the screen size, making it easier to create responsive designs..
  - **Pre-Built CSS Components**: Offers a wide range of CSS components, such as buttons, forms, navigation bars, cards, modals, and more. These components will be pre-styled, saving time and effort in designing and styling from scratch.
  - **Integration with Other Tools**: Can be integrated with other popular web development tools and frameworks, such as React and Next.

PROJECTS

- **Shopio-Ecommerce Website**
  - **E-commerce Platform**: The online platform provides businesses with a convenient way to sell their products and services online. It offers a user-friendly and modern UI design, making it easy for customers to navigate.
  - **Seamless Payment Integration**: The platform seamlessly integrates payment processing using Stripe, ensuring secure and hassle-free transactions for both businesses and customers.
  - **Efficient Management and Insights**: The platform offers an admin dashboard specifically designed for sellers. Sellers can easily access important information about their products, such as total sales, sales graphs, and order statuses. Additionally, the admin dashboard facilitates easy management of products, empowering sellers to efficiently handle their inventory. Guest users also have access to certain features, enhancing their experience on the platform.

- **Codlax-Contest Reminder**: An online contest reminder that creates an event in your calendar and attaches links, details, and timings of the contest. Can search for a particular person's profile by username. Easily sign in from a Google account. Tech Stack: Formik, Google Calendar SDK, React-hot-toast, React, node js, express js, MongoDB.

- **Notio-Online Notes Manager**: A highly responsive online notes manager application that stores notes in a database. Important notes can be selected and easily edited. All the notes will be sorted according to their added date. Users can access their specific notes. Tech Stack: MUI, ContextAPI, React, node js, express js, MongoDB.

- **Other projects**: Several other projects I've been working on are listed both on my portfolio here and Github here.

ACHIEVEMENTS AND HONORS

- Solved over 285+ problems, secured connoisseur batches on Leetcode continuously for five months. PROFILE
- 4 stars on Codechef (highest: 1853), global rank 22 in April long challenge. Profile: PROFILE
- Secured a global rank of 1203 in Google Kickstart 2023.
- Have participated in more than 100 coding contests.

CERTIFICATIONS AND OTHER EXPERIENCES

- **Codechef SnackDown**: Cleared Snackdown 2021 round 1B.
- **Setting up discord community**: I've been enthusiastic and have been actively working towards building up a discord community for students of our university who are interested in Coding.
- **Certification in google cloud facilitator program and Hacktoberfest**: Worked on different Cloud Computing technologies like Website on Google Cloud, Language Processing, and Building Interactive Apps with Google Assistant. Knowledge about different applications of google cloud like virtual machines, application programming interface, and many more. These were integrated projects that I executed on Qwiklabs. Explored open source community during hacktoberfest and selected.
